

ALUMINUM SODA CAN BAT

Supplies needed:

Aluminum soda can
Black fun foam
Black spray paint
Wiggle eyes
Markers or paint ---silver, white, pink
Ribbon

How to:

Squish an aluminum soda can—trying to get the top and bottom to squish in opposite directions. Spray paint can black. Cut wings and ears from fun foam and glue to the back of the squished can. Break the pop top off and glue on back of bat's head as a hanger. Glue eyes on. Draw on mouth, inside of ears and finger bones with marker or paint. Make a bow and glue below bat's head. Make multiples and hang on dead tree branches or hang a single bat on the wall.
